Government Order No. 1608-12—9875, dated the 5th December 1912, sanctioning the introduction of the block system of irrigation under the Marikanave Reservoir for six years in the first instance with effect from 1st July 1913, and approving of the recommendations of the Public Works Secretary regarding the working of the system by the Public Works Department.

No. R. 5724-34—L. R. 194-13-10, DATED BANGALORE, 31ST DECEMBER 1914.

ORDER THEREON.—The block system of irrigation, the introduction of which under the Marikanave Reservoir was sanctioned in Government Order No. 1608-12—9875, dated 5th December 1912, has now been in force for about a year and half and the results achieved so far are fairly encouraging. Out of an area of 7,427 acres selected for the block system, 6,648 acres are already under occupancy and only about 779 acres remain to be taken up by the raiyats. In addition to this area, the reservoir channels command another 5,600 acres which are fit for high class cultivation and which were, till recently, in the holding, on special terms, of the South India Industrials and Mr. D. Aminulla Sahib. If the block system be applied to this additional extent also, there will be roughly about 2,000 acres more available for block irrigation.

With a view to obtain the best results from the Marikanave Reservoir by utilizing its irrigational capabilities to the fullest extent possible, a special effort should be made to ensure that all the available land is taken up for cultivation under the block system and that settlers are attracted thereto from the other parts of the State where there may be surplus population. For this purpose, Government are pleased to issue the following instructions :—

(i) The extent of land now available for irrigation should be divided into blocks of convenient sizes of from 100 to 300 acres.

(ii) Each such block should be subdivided into plots of 15 acres in extent. Where smaller holdings are desired, the 15 acre plots may be further subdivided into 5 plots of 3 acres each. The 3 acres plot is intended for ordinary raiyats who, owing to lack of resources, may be unable to cultivate large areas and the 15 acre plot for men of enterprise and capital who may want large farms and be prepared to apply improved methods of cultivation.

(iii) These blocks with their sub-divisions into plots should be correctly marked on a map.

(iv) Whoever takes up any one of these plots, will also be given twice the area of dry land in convenient localities in the neighbourhood. These plots of dry land should also be marked on the map in the same way.

(v) After the division as outlined above is completed, statements should be prepared showing serially the extent of each plot in the block, and its corresponding dry plot outside the block.

(vi) For the convenience of the raiyats who take up these lands, proper village sites should be selected and roads required should be traced on the ground and both indicated on the map.

(vii) Steps should be taken to make available to the public copies of the maps, statements of plots and a brief description of the block system showing the rights and obligations of the raiyats holding land under it in an easily understandable form. Notices should be widely circulated in all parts of the State showing the extent of the available lands and the terms on which, they will be available at each ensuing sale.

(viii) After due publication of such notice the plots should be sold in public auction on appointed days once in three months commencing from a specified date. In special cases of hardship affecting raiyats who have already settled down in the irrigated tract, plots may be given on upset price, the reasons for such grant being recorded in writing in each case.

(ix) When the lands are sold by auction, care should be taken to see that no one is allowed to take up more than what his resources and capacity will enable him to cultivate. It should also be made a condition of the sale that the plots purchased should be brought under cultivation within three years, or where there is any special difficulty within four years, from the date of purchase. If the lands are not cultivated within the specified period, they are liable to resumption, free of claim to compensation.

(x) The lands thus taken up will be charged with one-third of the land assessment as well as one-third of the water-rate during the first year, two-thirds of such assessment and water rate during the second year and the full assessment and water-rate from the third year onwards.

3. The Chief Engineer is requested to take immediate action as regards items (i) to (vi) enumerated in paragraph 2 above and furnish the final lists and statements referred to in item (vii) to the Deputy Commissioner on whom the primary responsibility will rest for taking all steps necessary as regards items (vii) to (x) of the same paragraph in consultation with the Revenue Commissioner.

As it is understood that the area available is far in excess of the cultivating capacity of the local population, the Deputy Commissioner is requested to place himself in communication with the Deputy Commissioners of other Districts with a view to attract settlers. The Deputy Commissioner may recommend the grant of concessions to settlers, if he thinks it necessary.

4. During his recent inspections and enquiries in the Hiriyur Taluk, the raiyats in the canal area brought to the notice of the Dewan certain practical difficulties in working the rules of the block system, the most important of which were stated to be (1) the inclusion under the block system of some land unfit for irrigation and (2) the compulsory inclusion in one holding of more land than the owner either requires or can conveniently cultivate. These representations have been noted in detail, and as the difficulties are reported to be confined to a very small number of villages, the Public Works Department and the Deputy Commissioner should arrange jointly to conduct a detailed enquiry and deal with the individual grievances complained of. Cases in which special sanction of Government is necessary may be sent up for the orders of Government through the Revenue Commissioner. As the complaints mostly relate to the manner in which areas have been constituted into blocks, Government trust that the co-operation of the Revenue Department and the Public Works Department will lead to a very early settlement of the points raised by the raiyats and to the smooth working of the rules.

5. It has come to notice that lands not included in the block system have been allowed to be irrigated. This is against the root principle of the system. The irrigation officers as well as the local Revenue Officers should take steps to put a stop to all unauthorised irrigation and to strictly enforce the rules in future.

6. As the work in connection with the expansion of cultivation under the blocks in the taluk may require the services of a full time officer, Government are pleased to sanction the appointment, for one year in the first instance, of a Deputy Amildar. He will work under the orders of the Amildar of Hiriyur Taluk subject to the general superintendence of the Deputy Commissioner. The Amildar should co-operate with the Irrigation Department in all the measures needed for the efficient working of the block system. More specifically stated, the Deputy Amildar's duties will be :—

(1) To work out all the details of the scheme outlined above, the responsibility for which rests with the Revenue Department.

(2) To co-operate with the Irrigation officer in conducting a careful enquiry into the alleged grievances of the raiyats in the canal area and getting them remedied.

(3) To attract settlers to the tract, provide facilities for them and assist, as far as possible, in peopling the tract with cultivators both from the neighbourhood as well as from distant places.

(4) To initiate all such measures as may be necessary for the full expansion of irrigation under the Marikanave Reservoir.

The Deputy Commissioner may name one or two officials of his own choice for the post of the Deputy Amildar to be appointed under this order.

7. The Deputy Commissioner is requested to submit a half-yearly report of progress made in giving effect to this order. The first report will fall due on 1st July 1915.

Sinking Draw-wells in Villages of the State.

No. 5248-59—SAN. 38-12-38, DATED 6TH JANUARY 1915.

GOVERNMENT OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

READ—

Letter No. 96, dated the 14th August 1912, from the Deputy Commissioner, Chitaldrug District, requesting sanction from State Funds to an annual grant of Rs. 20,000 for a period of five years, for providing draw-wells in as many villages of the district as possible with a view to prevent epidemics of cholera in the district, as the District Board is unable to meet the cost in question though it is a legitimate charge on its funds.

2. Letter No. 2828, dated the 15th January 1914, from the Sanitary Commissioner, recommending an annual grant of one lakh of rupees from Provincial Funds for the improvement of existing water-supply in villages in the several districts.

3. Communications from the Deputy Commissioners of districts, furnishing information as to the number of draw-wells to be sunk in the districts, during the next five years, the approximate cost involved, the cost of earthwork to be executed by the villagers and the amount that can be made available from the District Funds for the purpose.

Order No. 5248-59—San. 38-12-38, dated Bangalore, the 6th January 1915.

ORDER.—As more than nine-tenths of the population in the State live in villages the improvement of water supply is a measure of great importance for the prosperity of rural areas. The chief sources of supply in such areas at present are wells, tanks, streams, rivers and irrigation channels. Of these draw-wells are best suited to villages as they can be more easily protected from contamination than other sources of water-supply.

2. The duty of providing good water-supply in villages rests primarily on the District Boards concerned. Under the existing practice, the cost of stone work is contributed by the District Board, the earthwork being done by the villagers. From the statements received from the Deputy Commissioners of Districts it is observed that the number of new draw-wells required in all the districts is about 3,000 and the cost is estimated at about eleven lakhs. The amount that can be made available from District Funds for contributions to works of this character does not exceed on the average Rs. 47,000 annually and taking the cost of eathwork done by the raiyats as equal in amount, it will not be possible according to the arrangements now in force to undertake more than a limited number of such works every year, without a special State grant.

3. Out of the two lakhs of rupees annually provided for village improvement, half a lakh may be made available for sinking and improving wells and a similar amount is now spent from District Funds. In addition to this, Government have decided to make a special grant of one lakh of rupees annually for a period of three years for sinking and improving drinking-water wells and have already provided this amount in the current year's budget. The total amount of grant from State and other funds will thus be two lakhs and if an equal amount of contribution is received from the villagers either in cash or in the shape of labour, there should be no difficulty in carrying out all the well works required in about three or four years' time.

4. In order to facilitate the execution of an extensive programme of these works and the utilization of funds to the greatest advantage the following measures are necessary.

(1) Preparation and maintenance of a correct up-to-date list of drinking water wells required to be sunk or improved in each taluk arranged in the order of urgency and importance with complete information as to the contribution which the raiyats are prepared to pay and whether in cash or in the shape of labour.

(2) Selection of the more urgent wells to be undertaken each year at the commencement of each official year and the preparation of a regular working programme according to which the works will be carried out.

(3) Maintenance of a list of wells and statement of works to be executed during the year for the whole district in the offices of the Deputy Commissioner, for the sub-division in that of the Sub-Division Office and for the taluk in that of the Amildar with clear instructions as to the responsibility of each officer in giving effect to the programme.

(4) Progress reports of the work done should be obtained every month and checked in the District and the Sub-Division Offices. These reports should also be placed before the meetings of the District and Taluk Boards.

5. As far as possible no well should be sanctioned unless the villagers concerned contribute half the cost but in exceptional cases where owing to the poverty of the population or other sufficient cause (such as the well being required for the benefit of the depressed classes the entire amount of contribution cannot be raised) discretion will be given to the Presidents of District Boards to relax the condition. A list of cases in which an exception has been made should be submitted to Government.

6. The Presidents of the District Boards are requested to give wide publicity throughout the villages in the State to the facilities now given to the villagers to provide themselves with wells and to induce the people to raise the necessary funds to meet their share of the cost of constructing the wells.

7. The question of providing each district with proper boring apparatus so that investment of money on wells likely to prove failures may be avoided is engaging the attention of Government but until a cheap and effective apparatus is devised for the purpose local officers will be expected to exercise great care in the selection of sites for wells and before any costly work is commenced, the depth at which water may be found should wherever possible be ascertained by trial pits. The Chief Engineer is requested to furnish Presidents of District Boards with a few simple suggestions for selecting suitable sites for wells. Special attention should be paid in selecting the site to allow of the well being protected from contamination from the flow of drainage water and household sullage into it and of the adoption of other sanitary precautions.

8. The special allotment of one lakh will be treated as a contribution to the Local Funds and a quarterly statement of the wells sanctioned, the amount utilized, the amount of contribution raised by the villagers should be submitted to Government.

9. The sinking of wells should be, as far as possible, entrusted to the local village agencies and where this is not possible arrangements may be made to get the work done by local contractors. The Presidents of District and Taluk Boards are expected to see that the work is properly executed and that no bills are paid unless the work has been checked by a responsible officer.

10. Each well as soon as it is constructed should be protected by a suitable parapet and all necessary precautions taken to keep the water free from contamination.

11. The Chief Engineer is requested to prepare and submit by 31st March next a set of simple instructions for sinking drinking water wells with suitable type designs for wells of different kinds.

12. The Sanitary Commissioner is requested to submit at an early date a few rules which may be distributed to Village Committees to help the villagers to maintain village water-supplies in a state of purity and free from pollution.

13. The Presidents of District Boards will intimate at an early date the amount required in each district out of the current year's allotment and take effective steps to utilize the grants placed at their disposal. The allotment required for the next year may be intimated before the end of March.

MEMORANDUM.

Dated 1st January 1915.

Australian fruit trees do much better in India than those imported from European countries on account of similarity of climate and coincidence of season; but they do not keep long in pots and should be planted out in their permanent places on arrival. This precludes keeping a stock of these on hand in the Lal-Bagh until our own stock is ready for sale.

It is therefore intended to import a large number direct from Australia, same as in previous years, and distribute them to intending growers immediately on arrival about the beginning of July next. Before sending in the indent it is necessary that some idea should be had as to the approximate demand. Will therefore gentlemen as are desirous of availing themselves of the opportunity, oblige by informing the undersigned before the 15th March 1915, the kind, variety and number of fruit plants they want stating their address in full and the Railway Station to which the parcel should be booked.

A list of fruit trees intended to be imported is herein attached with approximate prices as delivered at the Lal-Bagh, Bangalore. All charges for packing and forwarding to destination would be extra.

G. H. KRUMBIEGEL,
Economic Botanist.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE,
Dated Bangalore, the 10th February 1915.

T. G. RAMA IYER,
For *Revenue Commissioner.*

MEMORANDUM.

Dated 1st January 1915.

Australian fruit trees do much better in India than those imported from European countries on account of similarity of climate and coincidence of season; but they do not keep long in pots and should be planted out in their permanent places on arrival. This precludes keeping a stock of these on hand in the Lal-Bagh until our own stock is ready for sale.

It is therefore intended to import a large number direct from Australia, same as in previous years, and distribute them to intending growers immediately on arrival about the beginning of July next. Before sending in the indent it is necessary that some idea should be had as to the approximate demand. Will therefore gentlemen as are desirous of availing themselves of the opportunity, oblige by informing the undersigned before the 15th March 1915, the kind, variety and number of fruit plants they want stating their address in full and the Railway Station to which the parcel should be booked.

A list of fruit trees intended to be imported is herein attached with approximate prices as delivered at the Lal-Bagh, Bangalore. All charges for packing and forwarding to destination would be extra.

G. H. KRUMBIEGEL,
Economic Botanist.

MEMORANDUM.

Dated 1st January 1915.

Australian fruit trees do much better in India than those imported from European countries on account of similarity of climate and coincidence of season; but they do not keep long in pots and should be planted out in their permanent places on arrival. This precludes keeping a stock of these on hand in the Lal-Bagh until our own stock is ready for sale.

It is therefore intended to import a large number direct from Australia, same as in previous years, and distribute them to intending growers immediately on arrival about the beginning of July next. Before sending in the indent it is necessary that some idea should be had as to the approximate demand. Will therefore gentlemen as are desirous of availing themselves of the opportunity, oblige by informing the undersigned before the 15th March 1915, the kind, variety and number of fruit plants they want stating their address in full and the Railway Station to which the parcel should be booked.

A list of fruit trees intended to be imported is herein attached with approximate prices as delivered at the Lal-Bagh, Bangalore. All charges for packing and forwarding to destination would be extra.

G. H. KRUMBIEGEL,
Economic Botanist.

No. G. 8721-70—E. A. 33-14-1, DATED 11TH FEBRUARY 1915.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

GENERAL AND REVENUE DEPARTMENTS.

Order No. G. 8721-70—E. A. 33-14-1, dated 11th February 1915.

With a view to better regulate the method of dealing with petitions in public offices in the State, the Government of His Highness the Maharaja are pleased to issue the accompanying rules, in supersession of the existing ones on the subject.

D. M. NARASINGA RAO,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Heads of Departments.
The Deputy Commissioners of Districts.
The Compiler, *Mysore Gazette*, for publication in the Gazette.

RULES FOR THE RECEIPT AND DISPOSAL OF PETITIONS.

1. Nothing contained in these rules will affect the procedure, if any, prescribed by law or by competent authority for any special classes of petitions.

2. Every petition must be written on the three pie petition paper prescribed for the purpose or at any rate on durable stout paper of that size, leaving a quarter margin blank on the left hand side. The court fee stamp, if any, should not be affixed on the left hand quarter margin.

3. Every petition must be complete in itself and refer to a single subject. It should contain all material facts and arguments relied on by the petitioner. All documents in the possession of the party necessary for its disposal or copies thereof should accompany the petition. Appeal petitions should be accompanied by authenticated copies of the orders appealed against or endorsements issued to the party.

4. Every petition must be legibly written and as concisely as the nature of the case admits of. It should not be unnecessarily prolix, or couched in unintelligible, exaggerated or disrespectful terms.

5. Petitions should conform to the stamp law, if any, applicable to the matter to which they relate.

6. Petitions not addressed to the lowest authority competent to grant the relief prayed for will be referred to such authority, and the fact intimated to the party.

7. Petitions from persons in the service of Government relating to any matter affecting their official position should be forwarded only through their official superiors.

8. When a petition is not drawn up or presented in conformity to the preceding rules, it will be returned with an endorsement specifically pointing out which of the rules have been infringed.

9. Petitions may be presented in person or posted to the address of the officer or placed in a box provided for the purpose in each office. Petitions by telegraph will not generally be attended to.

10. If the party desires an acknowledgment of the receipt of his petition, he may annex thereto a receipt with a court fee stamp of one anna affixed thereon, and the said receipt will be returned to him signed by the officer to whom the petition is presented or by some authorised agent of his office.

11. In respect of every petition conforming to these rules and presented in person or sent by post, a full endorsement in writing should be given embodying the final orders.

12. When orders cannot be passed on the day a petition is personally presented, the applicant should at once be informed of the probable time within which orders will be passed. He must not be kept waiting at the office for orders. When petitions otherwise received are not disposed of in a week, an acknowledgment should be sent by post to the petitioner, informing him when final disposal may be expected.

13. Petitions should not be referred to subordinate officers for report unless there is a real necessity ; and when reports are required, the points on which information is wanted should be clearly indicated.

14. Copies of orders passed on petitions should, as far as possible, be delivered to petitioners in person by the officer passing the order, the date of delivery being noted in the order. Where this is not practicable, the order should be sent in duplicate to the subordinate officer, who will deliver one copy to the parties concerned and note on the other the actual date of delivery under his signature.

15. Every petitioner should be informed of the final order on his petition direct from the office to which the petition was presented and not referred to any subordinate office for an answer to his petition, except in cases covered by Rule 6.

16. After the passing of a final order, no notice will be taken of a second petition on the same subject, unless new matter requiring special consideration be introduced.

17. Petitions should be received daily at a fixed hour during office hours by the officer himself and not by the clerks. He should keep to that hour as far as the exigencies of business will permit.

18. A notice informing the public of the hours between which petitions should be presented should be affixed to a notice board outside the office.

19. When a petition is sent for explanation or report to a subordinate officer, a reply should be despatched within ten days after its receipt if the required information can be obtained from the records. But if it is necessary to investigate the matters referred to in the petition by the examination of individuals or by reference to subordinate officers at a distance, the report should be sent as early as practicable within a month. If a longer time is absolutely necessary, an *ad interim* report should be submitted and further time obtained.

20. In all offices where the average number of petitions received in a year exceeds fifty, a separate register should be maintained for entering petitions. But copy applications, darkhasts and other kinds of petitions for which special registers are maintained need not be entered in the petition register also.

21. Below the entry of each petition sufficient space should be left for entering reminder petitions, if any should be received.

22. The register should be in the form appended below :—

1	2	3	4	5	6
Number	Date of receipt	Petitioner's name and place of residence	Purport of petition	Notes of action taken	Date and order of disposal in brief

Note.—In column 5 should be entered briefly every step in the progress of the case, including references if any, made upon the petition to other offices and the replies received therefrom.

23. An Alphabetical Index of places and persons should be attached to the register and written up from time to time.

24. Every officer who receives on the average more than fifty petitions a year should submit to the authority to whom he is immediately subordinate a quarterly return in the following form. Explanations for all cases pending over six months should be appended.

1. Pending from last quarter.
2. Received during the quarter.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

DEPARTMENTS OF EDUCATION AND AGRICULTURE.

READ—

Official Memorandum, Camp No. G. 1-54—G. M. 55-12-208, dated 14th June 1913, directing, among other things, the formation of Town and Taluk Progress Committees and defining their functions.

Order No. 4450-4500—A. & I. 17-14-39, dated 28th April 1915.

In paragraphs 23 to 27 of the Official Memorandum read above were prescribed certain tentative rules defining the formation, composition and functions of Taluk and Town Progress Committees. Since the issue of that order, Progress Committees have been formed for 59 Taluks, 3 Towns and 1 City and have started work. The experience that has been gained so far indicates the need for explaining in greater detail what the aims and objects of these Committees should be, and for modifying in certain respects the rules about their composition. The rules and suggestions accompanying this order are therefore issued in supersession of the directions contained in paragraphs 23 to 27 of the official memorandum under reference and will come into effect from the date of this order.

The Deputy Commissioners and Presidents of District Committees are requested to take necessary action to reconstitute the Committees according to these rules as early as possible. The report for the period ending the 31st March 1915 will, however, be drawn up according to the directions laid down in the memorandum of the 14th June 1913.

To—The Secretary, Economic Conference.

RULES AND SUGGESTIONS FOR CARRYING ON THE WORK OF PROGRESS COMMITTEES.

1. Introductory.—A Progress Committee will be ordinarily appointed for a taluk including the headquarter town.

In the case of any town or city with sufficient economic interests of its own to require continuous attention, a separate Town or City Progress Committee may be formed.

Every Progress Committee shall be called a Taluk, Town or City Progress Committee according to the area to which it pertains.

2. Formation of Committees.—The formation of Progress Committees will be ordinarily left to the initiative of the representative people of the area concerned.

(2) A sum of not less than Rs. 100 should be collected by voluntary subscription before a Committee can be formed.

(3) An application for sanction to the formation of the Committee should be made to the Amildar by the representatives of the locality and should be submitted to Government by him through the Deputy Commissioner and the Secretary, Economic Conference.

In the case of Progress Committees for District Headquarter Towns and the Cities of Bangalore and Mysore, an application should be made by the representatives of the people to the Deputy Commissioner or the President, Municipal Council, as the case may be, who shall forward it to Government, through the Secretary, Economic Conference.

3. Objects and Work of the Committee.—The chief aim of a Progress Committee is to develop the material prosperity of the area concerned and to collect and maintain correct statistics of its economic condition.

For this purpose the duties of the Committee will be—

(1) to serve as a thinking and organizing centre ;

(2) to examine the local economic needs and wants and prepare a statement of the more important ones in the order of their urgency ;

(3) to examine each defect and each need, collect information, consult experts and Government Departments concerned and frame practical working-schemes for remedying or supplying each (The investigation of each item should be pursued until a remedy is found or a decision come to. Collecting and spreading information on any subject, careful study, discussion, investigation, etc., if zealously pursued, cannot fail to lead to the growth of sound ideas and yield practical results.) ;

(4) to organise the collective resources and co-operation of the people in order to carry out large improvements, supply important wants and remove any great defects or disabilities of a taluk or town, for which schemes may have been prepared as per clause 3 ;

(5) to arrange for spreading a knowledge of new ideas and improved methods in agriculture, manufactures, etc., suggested by experts and to help in reducing them to practice with the assistance of suitable agencies and organisers spread over the taluk ;

(6) to encourage investigation and stimulate work in all occupations and professions through the agency of representative persons best qualified to develop each ;

(7) to help to multiply the occupations of the people ;

(8) to train young men in industrial pursuits, and equip people engaged in the various occupations with information, skill, discipline and capacity for hard work and continuous application with a view to increase their efficiency and earning power ;

(9) to promote capacity for co-operation and harmonious working for common objects ;

(10) to collect, compile and maintain essential statistics of production—both agricultural produce and manufactured products—and of other information of economic importance to the area ;

(11) to organize demonstrations, exhibitions and conferences ; and

(12) to organize committees, associations, societies, leagues, clubs, etc., for special objects.

4. Composition of the Committees, etc.—The Taluk Progress Committee shall consist of not less than five and not more than twelve members including the Amildar and the Special Sub-Registrar, if there is one. The members of the Committee shall hold office for one year but will be eligible for re-nomination.

The Progress Committee shall appoint an Executive Committee consisting of not more than five members including the Amildar and the Sub-Registrar. It will be the duty of the Executive Committee to carry on the work of the Progress Committee during the intervals between the meetings.

A Secretary may be appointed, if necessary, from among the members to act in that capacity both to the Progress Committee and the Executive Committee.

The members should be chosen so as to represent the several *hoblis* and towns and also any special commercial or industrial interests in the taluk. They should be chosen from among the most intelligent, practical and disinterested workers available in the locality and should, if possible, be selected by the representatives of the people. Hobli representatives may be selected by the Village Improvement Committees.

Only persons who undertake to give their time and service free and work earnestly to promote the objects of the Committee should be appointed members.

The Amildar will ordinarily be the Chairman of the Taluk Progress Committee.

A non-official Vice-Chairman may be appointed wherever the Committees desire it.

(2) Proposals for the nomination of each Committee should be sent up to the Secretary, Economic Conference, by the 1st March each year.

(3) In the case of Progress Committees formed for District Headquarter Towns and the Cities of Bangalore and Mysore, the Committees should include the Deputy Commissioner and the President of the City Municipal Council, respectively, and the Municipal Vice-President. The former will be the Chairman and the latter the Secretary to the Committee, unless otherwise specially decided. Two to three members may be elected from among the non-official Municipal Councillors and the remaining number selected from among leading citizens, care being taken that all important interests connected with education, industries, trade, etc., are properly represented.

The rules framed for Taluk Progress Committees will also apply *mutatis mutandis* to the Town or City Progress Committees.

These Committees will also have the privilege of making representations to the Municipal Councils in the area on the following subjects:—

(1) Municipal Finance.
(2) Public Health.
(3) Water-supply.
(4) Town Planning and Town Improvements.
(5) Education.
(6) Other matters of importance.

5. Programmes and Working Year.—The working year for the Progress Committees shall be the twelve months ending the 31st March every year.

A list of items of work which may usefully receive attention under each of these heads is attached as Appendix A. Additional subjects may be suggested for inclusion in the list according to the requirements and opportunities of each Committee.

Out of the list the Committee should select, with reference to the needs of the locality, not less than a dozen important items for special attention during the year.

Copies of the programme finally adopted should be sent for information to the President of the District Committee and to the Secretary, Economic Conference.

6. Funds.—As the necessary agency to be employed and the magnitude of the operations to be undertaken will depend chiefly on the funds collected and on the

number of workers available, every endeavour should be made to collect annually as large a sum of money as possible by subscriptions, donations and contributions through local agents, Village Improvement Committees, and by means of endowments, etc.

(2) The sources from which funds may be derived are: —

(i) Voluntary individual subscriptions and donations from leading people in the taluk.

(ii) Contributions from Village Improvement Committees and villages.

(iii) Collections at jatras, cattle fairs, festivals, etc., and

(iv) Grants from Government.

A sum of Rs. 2 to 5 per village, per annum, will give not less than Rs. 500 for each taluk.

If a sum of not less than Rs. 100 is collected from sources (i) and (ii) a grant of Rs. 100 will be made by Government once a year.

(3) The funds will be administered by the Committee subject to the general approval of the President of the District Committee.

(5) The Committee shall prepare an annual budget for all ordinary receipts and expenditure.

(6) All accounts should be properly written up and the receipts and expenditure should be audited once a quarter.

A statement of receipts and expenditure should be regularly read at each monthly meeting of the Committee and recorded as part of the proceedings.

The funds may be deposited in the Government Savings Bank or with a local Co-operative Society as may be approved by the Committee.

(7) An auditor or auditors shall be appointed every year by the members at the first monthly meeting, usually in April, whose duty it shall be to audit and examine the books, vouchers and accounts of the Progress Committee and to certify to the correctness of the accounts with reference to initial documents both as regards receipts and expenditure.

7. Committee Meetings.—Each Committee should ordinarily meet not less than once a month on a date previously fixed. Timely notice of such meetings with a statement of business should be sent to the members, say, a week beforehand, and they should be encouraged to come to the meetings fully prepared with their own suggestions or ideas upon the subjects included in the agenda. Meetings may be held occasionally at places in the taluk other than the taluk headquarters.

Except when otherwise decided by the Committee, the meetings may be open to the public.

(2) Members who are unable to attend a meeting should ordinarily intimate the fact beforehand to the Chairman or Secretary.

Any member absent from three consecutive meetings without sufficient reason is liable to forfeit his seat on the Committee.

If the Chairman and the Vice-Chairman are both unavoidably absent at any meeting, the members present may elect one of their own members to preside.

(3) The proceedings of the meetings should be regularly recorded in a book kept for the purpose and signed by the Chairman. They should be read over at the next meeting and confirmed.

At every monthly meeting, the work done during the previous month should be examined and the work for the next month should be defined and distributed among the members.

A brief report of work done each month should be submitted to the President of the District Committee and to the Secretary, Economic Conference, in the form given in Appendix B.

The meetings of the Executive Committee for giving practical effect to the proposals and wishes of the General Committee may be held more often and in a less formal manner.

8. Agencies.—Besides its own members, the Committee should gather round itself a large number of individual organizers and workers, one or more in each town or village, to translate into action the ideas and suggestions of the Committee.

(Every member of the Committee should help in this direction by enlisting the services of active workers outside the Committee.)

The Committee should invite and avail itself of the voluntary co-operation of Village Improvement Committees for all these objects.

(2) A list of items of work which may be undertaken by individual workers is appended. The list is intended to be suggestive and may be added to from time to time. (*Vide* Appendix C.)

When any item of work is entrusted to a Village Improvement Committee or any individual worker, a brief report of progress made should be obtained from the Committee or individual not less often than once in two months.

(3) In order to keep the Taluk Progress Committee in touch with the work of the Village Improvement Committees, the Amildar may arrange to place before the Committee for information the monthly reports received by him from the Village Improvement Committees.

9. Annual Report.—Each Committee should prepare a report of the work done during the year and have it passed at its meeting in March. It should be submitted to the President of the District Committee before the 15th April following. Some of the main points to be dealt with in the report are outlined in Appendix D.

The President of the District Committee should, on receipt of the annual reports of the Progress Committees, submit by the 30th April, a brief review of work done for the whole district.

10. Annual Conferences.—The Progress Committee may organize an annual conference at any convenient centre within the taluk, at which all matters of economic interest relating to the taluk and the work of Village Improvement Committees may be discussed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented three cups for competition at the Flower Shows.

(i) The Horticulturists' Cup:—This will be competed for by Nurserymen and Horticulturists.

(ii) The Amateur Cup:—This will be competed for by private gardeners.

These cups will be awarded to the Exhibitor who has obtained the highest aggregate in prizes won in all classes during the current Show.

(iii) The Floral Parade Cups:—There will be tow cups available for competition. One will be competed for by individual competitors and will be awarded to winner of the first prize and for the best florally decorated single Bicycle at the current show. The other will be competed for by teams of 4 to 6 Bicycles, ridden together and characteristically decorated.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

5. Ten days before the following Show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

6. Should a competitor win the cup at any two successive Shows, the cup will be his, or her, property for good.

7. Out of the money prizes won with the cups, a sum of Rs. 20, 15 and 15 respectively will be deducted to defray cost of a miniature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

8. Both professional and Amateur compete for the same money prize in the individual groups, but in order to make the competition amongst amateur for the amateur cup more complete and free from competition by professionals, marks to make up the difference in the money value will be given to the amateur whenever a professional has taken a higher prize in any group :—

Thus Nursery man A wins I prize Rs. 8.
Amateur B ,, II ,, 5.
,, C ,, III ,, 3.

Amateur B will get 3 marks in addition to his Rs. 5, so that his aggregate is the same as if he had won first prize. Similarly Amateur C will get 2 marks and takes position of second prize.

9. Gold, Silver and Bronze Medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal :—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of any exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the Prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any Show on the ground of deficiency of merit in the exhibits.

M. SRINIVASA RAO,
For *Sanitary Commissioner with the Government of Mysore.*

Proceedings of the Government of His Highness the Maharaja of Mysore.

No. Fl. 7389-437—B. 15-14-2, dated Bangalore, 15th June 1915.

ORDER.—To enable Government servants to make suitable provision for themselves in their old age and for their families Government have provided facilities by instituting the Life Insurance and Family Pension Funds. A representation has however been received from several officers requesting that in addition to these, a Provident Fund may be constituted similar to the funds in the Madras Presidency and other Provinces of British India.

Government are pleased to view the representation favourably and direct the formation with effect from the 1st July 1915 of a State Provident Fund open to all Government servants and governed by the rules annexed to this order.

The fund will be under the management of the Comptroller and accounts connected therewith will be kept in the Comptroller's Office.

At the close of each year the Comptroller will submit a report to Government regarding its working.

It is considered that, for the present, until the number of subscribers becomes numerous no extra establishment would be necessary for work connected with this in the Comptroller's Office.

J. S. CHAKRAVARTI,
Financial Secretary to Government.

To—The Comptroller, Mysore Government.
The Heads of Departments.
The Deputy Commissioners of Districts.

ANNEXURE.

RULES REGULATING THE STATE PROVIDENT FUND.

Scope of fund.

Rule 1.—The fund will be a general fund open to all officers in permanent pensionable and non-pensionable posts under Government or under Local or Municipal Boards.

NOTE.—Persons appointed on probation to substantive appointments are eligible to subscribe to the fund.

CONDITIONS OF MEMBERSHIP OF FUND.

Rule 2.—Subscription to this fund will be optional in the case of all officers except those who, under the State Life Insurance Rules, are required to compulsorily insure but are rejected by the Medical Officer or cannot do so on account of over age. In the case of such officers it will be compulsory. Subscribers must enter into an agreement to be bound by all these rules and any alterations that may be made in them from time to time.

Rule 3.—If an officer who is subscribing to the fund is transferred to foreign service he shall (in the absence of a special order of Government to the contrary) continue subject to these rules in the same manner as if he was not transferred.

Rule 4.—No right to withdrawal of the sum at the credit of a subscriber will be recognised other than is provided for in Rule 9.

RATE OF INTEREST.

Rule 5.—Compound interest at 4 per cent will be allowed on subscriptions; but Government reserve the right to reduce this rate at any time for officers who become subscribers to the fund after Government have announced their intention of reducing the rate.

NOTE.—If a subscriber dies, interest will be allowed on the amount at his credit in the fund up to the end of the month in which the death occurs, whether that amount is withdrawn before or after the end of that month. When a subscriber, being in permanent Government service retires, interest will be allowed up to the end of the month immediately preceding that in which he

quits the service. If a subscriber holding a temporary post exercises, on the termination of his appointment, the option, allowed by Rule 9 (1), of leaving in the fund the amount accumulated to his credit, interest will be allowed on that amount for not more than a year after the termination of employment. If the depositor subsequently obtains re-employment under Government, deposits not withdrawn will commence again to bear interest from the date on which subscriptions are renewed.

RATE OF SUBSCRIPTIONS.

Rule 6.—Except as hereinafter provided, the monthly subscription must not be less than $6\frac{1}{4}$ per cent, and not more than $12\frac{1}{2}$ per cent, on the salary of each subscriber for the month; and as between these two limits, must be at the rate of either $1\frac{1}{4}$, $1\frac{1}{2}$ or $1\frac{3}{4}$ annas in the rupee. In the case of persons whose pay is not more than Rs. 10 per mensem the rates may be at $\frac{1}{2}$ an anna or $\frac{3}{4}$ths of an anna in the rupee. If the officer is on foreign service, the subscription will be calculated on the pay he was drawing immediately prior to the transfer to foreign service.

A subscriber may alter his rate of subscription with effect from the beginning of any financial year, by giving notice before the end of the preceding year.

In the case of an officer on a permanent establishment, who is detached on temporary duty under Article 254 of the Mysore Service Regulations, subscription should be calculated on the salary actually drawn by him in his temporary appointment.

Similarly, in the case of an officer on deputation, subscription should be calculated on salary *plus* his deputation allowance.

SUBSCRIPTION DURING LEAVE.

Rule 7.—Subscriptions during leave of any kind will be optional. Subject to the limits of $6\frac{1}{4}$ and $12\frac{1}{2}$ per cent, they will be calculated on the allowances admissible during leave.

An officer on re-instatement after a period passed under suspension may be allowed the option of subscribing for that period. In the case of an officer who exercises the option of subscribing to the fund during leave without allowances, or on re-instatement after a period passed under suspension without allowances, it is left to the discretion of the Comptroller to determine, in each case the amount on which subscription should be paid, the general principle to be observed being that the subscription should be calculated on half the salary last drawn by the officer before he proceeded on leave without allowances, or was placed under suspension without allowances.

REALIZATION OF SUBSCRIPTIONS.

Rule 8.—Subscriptions will be recovered by deduction from pay bills but they may be made by remittance in cash to the Treasury when an officer is in foreign service or on leave.

When a subscriber draws his leave allowances in England at the State Bankers, his subscriptions may be paid by deductions from leave allowances, credit to the officer's account in the fund, in respect of such payments being given at the rate of fifteen rupees to the pound.

An officer who desires to subscribe during leave must notify his intention before hand in order to allow the deductions from his leave allowances being noted. He will not be permitted to discontinue subscribing during such leave.

An officer, who fails to notify his intention to continue to subscribe when proceeding on leave, can subsequently pay his subscription in cash.

WITHDRAWALS ON RETIREMENT OR DEATH.

Rule 9.—(1) Subject to the provisions of this rule the sum which accumulates to the credit of an officer in permanent employ will, when he quits the service, become his absolute property and be handed over to him unconditionally. An officer holding a temporary post may, on the termination of his appointment, either withdraw the amount standing at his credit or leave it in the fund. Any sum so left in the fund may be withdrawn at any time after cessation of service.

(2) In the event of an officer's death before retirement or after retirement, but before the money has been handed over,—

(*a*) it will be divided between his widow or widows and children in accordance with any request that he may have submitted in the prescribed form, which request must state the person to whom sums intended for the benefit of minors are to be paid; or it will be handed to such trustees as the subscriber

may appoint by will to administer, for the benefit of his widow or widows and children, the funds standing at his credit at the time of his death;

(*b*) if no such request has been submitted, it will be paid to the legal representative of the estate, as determined by a Civil Court having competence to pass orders in this respect; Provided that, if the sum remaining at the credit of the depositor does not exceed Rs. 500, it may be paid to such person or persons as the Comptroller considers to be entitled thereto.

(3) Ordinarily, officers should make their own arrangements at retirement to draw in India the sum at their credit in the State Provident Fund. In the case, however, of depositors and the beneficiaries of deceased depositors who are resident in England, Government may order payment in England at the market rate.

ADVANCE FOR SPECIAL PURPOSES.

Rule 10.—No final withdrawal will be allowed until the subscriber quits the service or dies. But when the pecuniary circumstances of the subscriber are such that the indulgence is absolutely necessary, a temporary advance not ordinarily exceeding three months' pay may be allowed from the sum at his credit at the discretion of the sanctioning authority, who shall be—

1. The Government, for gazetted officers and for all payments exceeding Rs. 300.
2. The Head of the Department, for non-gazetted officers for payments exceeding Rs. 50 but not exceeding Rs. 300.
3. The Head of the office, for non-gazetted officers for payments not exceeding Rs. 50.

The following may be recognised as legitimate occasions for advances—

(*a*) to pay expenses incurred in connection with the illness of the subscriber or a member of his family;

(*b*) to pay for the passage of any member of a subscriber's family coming from beyond the sea to join him, or requiring to make a journey beyond the sea from some urgent cause;

(*c*) to pay expenses in connection with the marriages, funerals or ceremonies which by the religion of the subscriber it is incumbent upon him to perform and in connection with which it is obligatory that expenditure should be incurred.

Note.—Advances, though not confined rigidly to the objects laid down in clauses (*a*) to (*c*) above will be made with a due regard to the principles contained in those clauses and regulated with regard to the amount of subscriptions lying to the credit of the applicant.

Advances will be recovered at the discretion of the sanctioning authority in not less than twelve monthly instalments or more than twenty-four. A subscriber may, however, at his option, make repayment in less than twelve instalments or may re-pay two or more instalments at the same time. Recoveries will be made monthly, commencing from the first payment of a full month's salary after the advance is granted, but no recovery will be made from an officer while he is on leave of any kind. Recovery may also be postponed while an advance of pay granted to him on transfer is being recovered. The instalments will be paid by compulsory deductions from salary, and will be in addition to the usual subscription.

RESERVATION OF POWER TO GOVERNMENT TO ALTER RULES.

Rule 11.—The Government reserve to themselves the power to amend or alter the rules as may be required.

PROCEDURE.

Rule 12.—The deposits received under the foregoing rules will be credited on the books of the Government to an account named "The State Provident Fund." The general administration of the fund will rest with the Government in the Finance Department, and the accounts will be kept by the Comptroller to the Government of Mysore.

Rule 13.—A depositor must when paying a subscription, whether his subscriptions to the fund are recovered by deduction from bills or paid in cash, specify the number of his account which will be communicated to him by the Comptroller.

Rule 14.—The interest under Rule 5 will be allowed for each calendar month upon the minimum balance of the depositor's account between the close of the fourth day and the end of the month. It will be added to the principal at the end of the official year except when the account is to be finally closed.

YEARLY ADVICE TO DEPOSITORS.

Rule 15.—As soon as possible after the close of each year each depositor will receive a statement of his account with interest made up to 30th June. Depositors are required to

satisfy themselves as to the correctness of these statements; and unless errors in them are brought to the notice of the Comptroller, within one month from the date of their receipt, Government will not be responsible for any sums not included in the account.

Rule 16.—Any depositor may once in the official year, but not oftener; receive, on application to the Comptroller a copy of his account for the last official year and for so many months of the current year as may have been posted and agreed.

Rule 17.—The Comptroller will endeavour to secure by issue of reminders that all depositors shall submit in the prescribed form the "request" provided for in Rule 9 (2) (*a*) of the rules. Each depositor should be invited to revise this declaration at least once a year. All such declarations still in force should be carefully recorded.

LIST OF ARTICLES THE EXPORT OF WHICH IS PROHIBITED.

April 14, 1915.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented three cups for competition at the Flower Shows.

(i) The Horticulturists' Cup:—This will be competed for by Nurserymen and Horticulturists.

(ii) The Amateur Cup:—This will be competed for by private gardeners.

These cups will be awarded to the Exhibitor who has obtained the highest aggregate in prizes won in all classes during the current Show.

(iii) The Floral Parade Cups:—There will be tow cups available for competition. One will be competed for by individual competitors and will be awarded to winner of the first prize and for the best florally decorated single Bicycle at the current show. The other will be competed for by teams of 4 to 6 Bicycles, ridden together and characteristically decorated.

2. The money value of the prizes will be taken in calculating the aggregate:

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

5. Ten days before the following Show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

6. Should a competitor win the cup at any two successive Shows, the cup will be his, or her, property for good.

7. Out of the money prizes won with the cups, a sum of Rs. 20, 15 and 15 respectively will be deducted to defray cost of a miniature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

8. Both professional and Amateur compete for the same money prize in the individual groups, but in order to make the competition amongst amateur for the amateur cup more complete and free from competition by professionals, marks to make up the difference in the money value will be given to the amateur whenever a professional has taken a higher prize in any group :—

Thus Nursery man A wins I prize Rs. 8.

Amateur ... B ,, II ,, 5.

,, C ,, III ,, 3.

Amateur B will get 3 marks in addition to his Rs. 5, so that his aggregate is the same as if he had won first prize. Similarly Amateur C will get 2 marks and takes position of second prize.

9. Gold, Silver and Bronze Medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal :—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of any exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the Prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any Show on the ground of deficiency of merit in the exhibits.

(i) The Horticulturists' Cup:—This will be competed for by Nurserymen and Horticulturists.

(ii) The Amateur Cup:—This will be competed for by private gardeners.

These cups will be awarded to the Exhibitor who has obtained the highest aggregate in prizes won in all classes during the current Show.

(iii) The Floral Parade Cups:—There will be tow cups available for competition. One will be competed for by individual competitors and will be awarded to winner of the first prize and for the best florally decorated single Bicycle at the current show. The other will be competed for by teams of 4 to 6 Bicycles, ridden together and characteristically decorated.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

5. Ten days before the following Show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

6. Should a competitor win the cup at any two successive Shows, the cup will be his, or her, property for good.

7. Out of the money prizes won with the cups, a sum of Rs. 20, 15 and 15 respectively will be deducted to defray cost of a miniature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

8. Both professional and Amateur compete for the same money prize in the individual groups, but in order to make the competition amongst amateur for the amateur cup more complete and free from competition by professionals, marks to make up the difference in the money value will be given to the amateur whenever a professional has taken a higher prize in any group:—

Thus Nursery man A wins I prize Rs. 8.

Amateur B ,, II ,, 5.

,, C ,, III ,, 3.

Amateur B will get 3 marks in addition to his Rs. 5, so that his aggregate is the same as if he had won first prize. Similarly Amateur C will get 2 marks and takes position of second prize.

9. Gold, Silver and Bronze Medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of any exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the Prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any Show on the ground of deficiency of merit in the exhibits.

May 13, 1915.

NOTES.

1. As a general rule, goods in transit through Sweden will not be detained or interfered with (even if their exportation from Sweden is prohibited) provided that they are accompanied by a bill of lading clearly indicating the ultimate (non-Swedish) destination. (17641)

As an exception to this rule, however, the transit through Sweden of arms, ammunition, and other war material is prohibited. The articles to which this prohibition of transit applies are indicated by a cross (×) in the list printed below.

* The numbering of the headings in the Tariff has been altered since 1910 when the Board of Trade translation of the General Customs Tariff was published. The most convenient form in which the Tariff in its present form can be consulted is the translation published by the International Customs Tariff Bureau at Brussels (No. 93, Second Edition, March 1912).

NOTE.—In all groups under this class the floral decoration should be the essential feature. All papers or artificial flowers should be avoided. Dress and Ribbons should be so selected as to bring out the effect of the flowers rather than to put the flowers into the back ground.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the Overseer, Parks and Gardens, Mysore City, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Show Ground before 4 P.M., on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the judges to reduce the amount of prizes, if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, over-crowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words, kinds and varieties may be illustrated as under:—Apples, Oranges, Figs, Grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples, Roses, Chrysanthemums, Dahlias, etc., are distinct *kinds* of flowers. 10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden, nor is it permissible to collect plants from different gardens and exhibit under a single name.

11. If funds are available, the judges may award special extra prizes in case of exceptional merit.

12. All exhibits sent for competition must be the *bona fide* produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Mysore.

The Judges may withhold any prize until proof of these conditions be produced.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a judge in any class in which he may be an exhibitor.

15. Similarly while judging is going on, no exhibitor is permitted to be in the Exhibition buildings and any exhibitor acting contrary after being asked to retire will have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

17. It will be open to the Judges to withhold any or all of the prizes on the ground of deficiency of merit in the exhibits.
